World weather 1982, 36:14

Australia
Australia: A rich tradition of weather study, 36:103
Bushfire weather, 36:126
Cirrus clouds in tropical Australia, 36:132
Climatic rating—planning outdoor activities, 36:121
The cold fronts research program: Working together to study "summertime cool change," 36:113
The dry continent, 36:122
Floods—Australia's "awful visitations," 36:114
Forecasting "down under," 36:108
The morning glory, 36:134
The study and effects of ultraviolet radiation, 36:138
Tropical cyclones of the Australian region, 36:118

Climate
Climate models: A frontier in petroleum exploration, 36:230
Computers and the weather, 36:224
Computer simulation of atmospheric "blocking," 36:232
An eye to the clouds: Studying small-scale phenomena, 36:236
The NCAR community climate/forecast model: A tool for university climate and weather research, 36:228
An ocean model: The climate effects of diverting river water away from the arctic, 36:238
Studying the mesoscale: More accurate weather forecasts, 36:234

Clouds
An eye to the clouds: Studying the small-scale phenomena, 36:236

Cold Weather
Profiling Colorado's Christmas Eve blizzard, 36:60
Temperature extremes during 1982, 36:67

Computers
Climate models: A frontier in petroleum exploration, 36:230
Computers and the weather, 36:224
Computer simulation of atmospheric "blocking," 36:232
An eye to the clouds: Studying small-scale phenomena, 36:236
The NCAR community climate/forecast model: A tool for university climate and weather research, 36:228
An ocean model: The climate effects of diverting river water away from the arctic, 36:238
Studying the mesoscale: More accurate weather forecasts, 36:234
For the amateur: Using the home computer as a facsimile receiver, 36:308
For the amateur: Using home computers to study the weather, 36:193

El Niño
El Niño: The great equatorial Pacific Ocean warming event of 1982–83, 36:166
Preaching the sermon of survival: Neil Frank of the National Hurricane Center, 36:177

Films in Meteorology (chronological order)
Weather Fronts and Precipitation, 36:201
Tornadoes and other local storms, 36:201
Before the Hurricane Strikes, 36:306
Weather and Radar, 36:306

Forecasting
A conversation with Donald Gilman: Predicting the weather for the long term, 36:291

Historical Meteorology
Tornadoes of fire, 36:298

Hot Weather
Temperature extremes during 1982, 36:67
The weather and circulation of 1982, 36:4

Hurricanes
Audio visuals about the weather: Hurricane awareness, 36:306
Preaching the sermon of survival: Neil Frank of the National Hurricane Center, 36:177

International Weather
The weather of Australia, 36:100
World weather 1982, 36:14

Instruments
For the amateur: Instruments get dirty, too, 36:80

Lightning
Lightning, 36:71
Weather queries: Why is some lightning colored?, 36:307

Meteorologists
Climatology helps in solving crimes, 36:301
A conversation with Donald Gilman: Predicting the weather for the long term, 36:291
The making of a scientist, Part one, 36:76
Preaching the sermon of survival: Neil Frank of the National Hurricane Center, 36:177

Covers (chronological order)

February 1983: Dawn, Texas tornado, Tim Marshall
April 1983: Weather page, *USA TODAY*
June 1983: Australian sheep ranch, Australian Information Service
August 1983: Pacific Ocean, NOAA
October 1983: Climate model, NCAR
December 1983: Supernumerary rainbow, Alistair B. Fraser
